## ***ROTA BOY***<sup>®</sup>

### **PANEL LIFTING AND TURNING DEVICE FOR THE SAFE HANDLING AND RAPID INSTALLATION OF INTERLEAVED ROOF PANELS**

The Rota Boy<sup>®</sup> is a unique machine specifically developed for use with roof panels to solve the handling and installation problems associated with long panel lengths and interleaved packs.

Using internal re-chargeable batteries to operate powerful suction pads, the Rota Boy<sup>®</sup> can lift individual roof sheets up to 66' long. In addition, the machine can rotate panels through 180° without any manual handling or risk of panel damage.

Another benefit of this unique machine is that it can be used to tilt the panel as it is lowered onto the roof and rotate the edge lap into position to create the perfect joint.

#### Machine specification ó

- Fully self-contained unit with integral lifting eye
- Supplied as a complete kit with all necessary accessories including support horse trestles, transport and storage cradle
- Fully galvanized structural frame
- Push button operation to control suction, release and panel rotation
- Powered by internal rechargeable dry cell batteries with integral 110V battery charger
- Capable of lifting panels up to 66' long and 880lbs weight
- Lifting capacity of 1100 LBS (500Kg)
- Audible warning device and indicator lights for safe vacuum level indication
- Clear battery meter with low battery warning
- Secondary fall arrest straps
- Full 12-months warranty of all parts excluding suction seals
- Dedicated examination, testing and certification service.
