GRABO® *PRO–Lifter* – the world's first hand held, battery powered vacuum lifter, for porous and non-porous surfaces

GRABO® *PRO–Lifter* $299.00 USD

Article No: 67-GPL-20-GP-1LI-FB

•1 Grabo PRO-Lifter • 1 multi-socket charger • 1 battery • 1 seal (preinstalled) • 1 heavy duty carry bag

The GRABO makes much easier handling of everything from composite panels, facade panels, tiles and stone to plasterboard and appliances, reducing the strain on your fingers and back. Some of the trades that are proving it invaluable are metal siding installers, worktop fitters, landscapers, tilers, memorial masons, dry liners, glazers and the manufacturing sector.

The Grabo Pro-Lifter is equipped with a smart digital pressure sensor. With the pressure sensor, you don't have to worry about turning the Grabo Pro-Lifter on or off. One press of the motor power button suction is activated. The motor turns off when the sensors detect the optimum level of suction. The sensors digitally detect and maintain the required suction turning the motor on and off as needed. The digital display on the grab handle shows the suction applied.

- Grabs many surfaces, including wet, dusty, riven or porous materials
- Perfect for IMP's, metal panels, paving, tiling, worktops, cover slabs, plasterboard, glazing, appliances, etc
- Keeps your hands out of messy primer and adhesive
- Less strain on your fingers and back
- Can lift up to 375 lbs

These units are available from stock at our Indiana, Tennessee and Nevada locations.
